

# IS ZUDDAS CAVE AND CANTINE DI SANTADI WINERY

The **Cave of Is Zuddas** is a beautiful example of karst formation, featuring a winding path that extends for more than 500 meters underground. The cave, hosted in dolomitic rocks dating back to about 530 million years ago, is characterized by multiple types of speleothems in continuous evolution. Several chambers can be visited, each filled by different types of carbonate minerals' deposition. In addition to the common stalactites and stalagmites, efflorescences of rarer helictitic aragonites create bizarre shapes that seem to defy gravity.

The tour of the cave will be followed by a visit to the "**Cantine di Santadi**" historical winery, that produces famous and awarded wines refined from selected local grape varieties refined in volcanic tuff cellar. A wine tasting, accompanied by local cheeses and cold cuts, will be offered during the visit.

## COORDINATORS

Elisabetta Dore  
Franco Frau

Email: [elisabetta.dore@unica.it](mailto:elisabetta.dore@unica.it)

## DATES

Middle-Conference – WT-06

Starts: June 19, 2025 at 8:30 AM, at Cagliari Harbour

Ends: June 19, 2025 at 18:30 PM, at Cagliari Harbour

## NUMBERS OF PARTECIPANTS

Minimum: 25 | Maximum: 50

## COST

Participation requires a contribution of 30€ for the visit to the cellar and wine tasting

## TYPE OF TRANSPORTATION

Van for intercity trips and visits

## PREREQUISITES

Easy walking path.

## EQUIPMENT FOR INDIVIDUAL USE

Closed shoes without high heels

Warm suit (for the cave)

## INCLUDED IN THE PACKAGE

Ticket to the cave site

Meals: pocket lunch

Visit the historical winery

Opportunity of wine tasting
